

## Axle Pivot brackets

Tuff Country's EZ-Ride axle pivot brackets are ideal for the Ford owner having trouble aligning a 1.5" - 2.5" lifted vehicle. Tuff Country's brackets along with the camber adjustment bolts will restore the axles to the proper geometry by dropping the driver and passenger side axles allowing precise alignment. The camber bolt allows -2.25 to +2.25 degrees camber alignment adjustment.

## Ford Axle Pivot Brackets
