

Fabtech Multiple Shock System

Increase the dampening capacity of your vehicle with the addition of multiple shocks to the front suspension. The tubular Multiple Shock hoops bolt to the frame and do not require cutting of the inner fenderwell, keeping mud and water away from the motor. *(Note: Does not include shocks. If you want a blue system, leave the BK off the part number)*

Chevy 2500 HD Multiple Shock System

Year	Model	Part #	Pricing
01-06	6" GM 2500 HD	FAB FTS51002BK	
01-06	8" GM 2500 HD	FAB FTS51003BK	

Pro Comp Multiple Shock Systems

If you want to reduce body roll and improve your handling, a multiple shock system is a must.

99-04	F250/F350 Super Duty and Excursion 4WD (Shocks not Included)	PCS 52410B	

RCD Multiple Shock Systems

With an RCD multiple shock system on your ride, shock resistance is continually readjusting itself depending on the terrain you're driving on and the speed at which you're traveling. They also provide added control for offroading. You can easily install more shocks on your vehicle with RCD's Multiple Shock Kits.

Chevy 1500 Multiple Shock System

- For use on vehicles with the upper control arms in stock location.
- Requires wheels with a maximum backspacing of 4.625". Some vehicles equipped with wide aggressive tires (i.e. Boggers, etc.) may require additional backspacing.
- System is equipped with an engine cross over brace. Requires cutting of the inner fender well and some models may require relocation of wiring and brake hard lines.
- Kit includes (4) Bilstein 5100 series shock absorbers that are specifically valved for multiple shock applications.
- Tahoe / Yukon / Suburban equipped with rear air conditioning require #RCD 20-69267 for installation.
