I-TBA10 Pg 2

- 1. Park the vehicle on flat level ground & set the emergency brake.
- 2. Properly support the front of the vehicle & remove the OEM track bar & steering stabilizer.
- 3. Install the new Skyjacker front adjustable track bar by greasing & installing the two polyurethane bushings (Part # 2888) & sleeve (Part # 142121).
- 4. Insert the bushing end of the new Skyjacker front adjustable track bar into the OEM steering stabilizer location on the passenger side of the axle. <u>Note:</u> Not the OEM track bar location.
- 5. Install the new Skyjacker steering stabilizer mounting bracket. **Note:** The tab goes over the sway bar end link stud with the OEM nut. Use the supplied 1/2" x 2 1/2" flat socket head bolt & stover nut to bolt the new bracket to the track bar. (See Photo # 1) **Note:** In extreme situations depending on the pinion angle & caster settings, the drag link may contact this bracket when turning. This bracket can be slightly ground for additional clearance.
- 6. Install the frame end of the new Skyjacker track bar by following the hardware as shown. (See Photos # 2 & 3) **Note:** Be sure to keep the rod end square (parallel) with the frame mount & no more than 1/2" of threads are extended from the bar (including jam nut).
- 7. Hold the rod end in place with a crescent wrench & tighten using a wrench on the jam nut.
- 8. Install the frame end of the new Skyjacker track bar by following the hardware as shown. (See Photos # 14 & # 15) Note: Be sure to keep the rod end square (parallel) with the frame mount.
- 9. Check the vehicle to see if the body is centered over the tires & adjust the rod end as needed. Torque the bolt in the frame mount to 85-90 ft-lbs.
- 10. Install the new Skyjacker steering stabilizer mounting studs in the OEM hole the of drag link & new Skyjacker mounting bracket. Install the steering stabilizer on the new Skyjacker steering stabilizer studs. (See Photo # 4)
